

After a successful first edition in 2019, **HZ University of Applied Sciences** (Vlissingen, the Netherlands) and **AP University of Applied Sciences and Arts Antwerp** (Antwerp, Belgium) will join forces once again! We offer you and your colleagues the opportunity to share your expertise in education with approximately 120 Dutch and Belgian teacher training students in preprimary and primary education.

International Week in Vlissingen (NL) and Antwerp (BE)

FINDING CONNECTION IN EDUCATION

17/11/2020 – 20/11/2020

Our central theme is “**Finding Connection in Education**”: how can (student-) teachers connect with their pupils, with (international) colleagues, with their environment, with themselves, ...? What challenges do they face, especially since the corona outbreak, and how can they deal with these challenges?

As the global COVID-19 pandemic makes travelling unsure, our International Week will be mainly organized online. Only shortly before the start of the week, we will be able to confirm whether incoming staff mobility will be possible, considering our government’s measures.

Tuesday November 17th and Wednesday November 18th
Inspire and teach our students

Thursday November 19th
Coach our students while they prepare an assignment

Friday November 20th
If no corona restrictions apply, see how our students put their assignment into practice at their own internship school
