

SDG Good Practices in Tenerife

Sustainable Development Goals: Cases of Study

STAFF WEEK PRACTICAL TRAINING

The Sustainable Development Goals (SDGs), also known as the Global Goals, were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet, and ensure that by 2030 all people enjoy peace and prosperity.

The 17 SDGs are integrated—they recognize that action in one area will affect outcomes in others, and that development must balance social, economic and environmental sustainability. **Tenerife** is one of the eight Canary Islands, considered EU peripheral region. Discover with us in a practical way, how Tenerife is adapting to the United Nations SDG, the fragile environment, challenges, innovation and projects in this remote region of the Atlantic Ocean.

During the four days training in Tenerife the participants will discover the actions and projects that Tenerife is following towards *gender equity, accessibility, regenerative economy, good health and well-being, and renewable energies*.

Every single day *we travel around to discover* in different locations, visiting institutions, companies, associations and stakeholders cooperating and sharing best practices on *sustainable tourism, regenerative tourism, conscious hiking, and integrating society by using green energy*.

MAIN OBJECTIVES:

- To know practical examples of good practices following the SDG main objectives.
- To identify challenges and opportunities for advancing an integrated approach
- Nature connection and environmental consciousness
- To build professionals relationships and connections
- To embrace the essence of slow paced and eco-conscious journeys
- To learn about slow tourism and responsible travel in a fragile tourism destination.

LEARNING OUTCOMES:

- ✓ To establish long term cooperation with hosting companies and institutions for the future mobilities and projects of participants.
- ✓ To disseminate the result of the learning outcome as a teaching material for the students and to engage new students into sustainability actions.

- ✓ To learn about Canary Islands implementation of the SDGs and specifically Tenerife as a sustainable destination.
- ✓ Develop a sense of social responsibility towards environmental issues and take action to create a change in society.
- ✓ Acquire knowledge of environmental management and develop skills to manage sustainable environmental projects.
- ✓ Acquire knowledge about outdoor education, nature-based learning

TARGET GROUP:

This training course is designed for any member of an educational organisation: trainers, school management, administration staff, school/university teachers, marketing advisors, Erasmus+ Project Managers, International Offices staff, etc.

SPECIFICS:
