IT for University Staff – June 2023

Description

IT for University Staff is an intensive five-day course that aims to give training in three different areas:

- Awareness about hidden risks for the unaware Internet users, with practical **security** mini-lab
- Learning the use of MS **Access** tool, for administrative and academic purposes
- Discovering the magnificent and attractive **Prezi** tool to make striking presentations

Target groups are University Staff and Faculty from Higher Education Institutions.

Intended outcomes

Upon completing the course, participants will have strengthened their specific *Access* skills. Their competence in the usage, management and databases querying will have been increased. Applied problem solving abilities through *Access* resources will have been acquired. They also will recognize security issues that were not detected previously. And they will be prepared to start using *Prezi* for sharing their ideas with the most demanding audience.
