- Main language : English
- Secondary language : French

8. Full description of the training contents

Preparation to the training

English will be the official language of the course and the participants have to communicate with each other and with the trainers using english. A good knowledge of English is required to take full advantage of this training.
Participants will be familiar with an Internet browser such as Explorer, Firefox or Safari. In view of the limited time to spent on training, trainers will not have the time to spend with persons not having this knowledge base.
To the extent possible and to save time during training, are asked participants to register for the following online services:
Calameo: www.calameo.fr
Google Doc: https://accounts.google.com
Madmagz: http://madmagz.com
Prezi: www.prezi.com
Box.Net: https://www.box.com
Dropbox: http://dropbox.com,
An email address accessible from any computer (hotmail, Gmail, Yahoo...) is strongly recommended.
Persons having an iPad are invited to take it with them. For others, ipad will be available to them during training after signing an insurance contract.

Participants are invited to place on their Dropbox or Box.net all documents they consider to make a presentation of their country or to create a lesson using the ipad.

Objectives

- Provide technical knowledge and skills for learning and use concrete new multimedia applications such as cloud computing and collaboration in education.
- Provide the knowledge to use different tools that can be used directly for the participant courses (kahoot, plickers, guidigo…)
- Provide the necessary explanations to participants to enable them to discover the possible uses of tablets in the learning of their students.
- The course will enable participants to reflect on their approaches to teaching today face bathed at an early age in new technology students.
- Non-teachers participants may develop their own skills in ICT for use in their projects.
- At the end of this course, participants will have discovered and experiment with new tools and software available online, free or low cost.
- The course is designed to introduce participants to the potential of ICT in their daily practice and in the preparation of their collaborative activities or projects.

Methodology

- Most sessions will practice the proposed tools. Participants will not only learn to use these tools, but explain how and in what situations to use these tools.
- All sessions will be interactive allowing the participants to explore the proposed tools and discuss their practical applications with other participants and trainers.
- Participants will be active in class. They will create (alone or in a group) or a business for use in their courses using the technologies and programs presented during class sessions.

Follow-up

- Participants will receive a link to a Dropbox where all the work carried out during the course will be stored.
- Participants will receive the operating instructions of the software used on this same Dropbox.
- Participants will receive a certificate of participation to the training. Those wishing to receive the European passport attesting to their participation just have to ask.
- Participants will be invited to register on the eTwinning portal if it is not yet done in order to create a synergy between them for a follow-up to this training.
- A closed Facebook group will be created and proposed to the participants so that they can stay in touch after the training.
- Trainers will remain available to the participants after the training to answer any questions during the implementation of their project in their establishment.
